## Chamber of Commerce APP

This document will describe all the necessary information for the use of the Chamber of Commerce extension, created by Micro-Apps. This extension creates the possibility to check information against the database of the Dutch Chamber of Commerce. This app may therefore only be used to look up information of companies based in the Netherlands.

### Installation:

The installation of the Chamber of Commerce app is available via the Microsoft Marketplace for Business Central extensions/apps. From here you can automatically install the extension and make it available within every company within your Business Central environment.

For the correct working of the app, make sure that the setting of the Micro Apps Base App is set for "allowing HttpClient Request".

### Setup:

Once the installation is complete, the app needs to be set up. This can be done with the Chamber Of Commerce Wizard. This wizard contains all the necessary steps to completely set up the extension. The first step is to register yourself and to activate the trial or subscription. With the trial, you can use the app two weeks free of charge. After the trial period, you need to activate the subscription. Make sure both fields are checked (like the example in the right picture.)

The Chamber Of Commerce application is automatically enabled after completing this wizard. If you don't want to disable it go to the next page. The permissionset 'Chamber of Commerce' is automatically assigned for all users by installation of this application.

After those steps, click on Next and the wizard is done. Please follow the steps below to make use of this application.

## Using Chamber of Commerce APP

With the installation of the extension a set of actions are made available on both the customer and the vendor cards within Business Central. These actions let the user either search for the corresponding information in the Dutch Chamber of Commerce database or check whether the information on the cards are the same as those that are known at the Dutch Chamber of Commerce database. These actions will be visible from both cards under **process** in the ribbon.

### Search in Chamber of Commerce database

The action **Search in Chamber of Commerce** lets you search based on a couple of field, these fields include: Chamber of Commerce No., Company name and Postal code. You may use either of the three fields to lookup a customer or vendor. With the button 'Search in Chamber of Commerce information' in the ribbon, the search is performed.

## Check information against Chamber of Commerce

Besides searching in the database of Chamber of Commerce, it is also possible to check the information that is present within Business Central against the database of Chamber of Commerce. This is done via the action in the ribbon, **Check information from Chamber of Commerce**. Directly after clicking, the extension will search for all the records that are known based on the company name. This will then show a list of all know address with the same company name.
