Installation

All apps are available through the Microsoft Marketplace for Business Central extensions/apps. From here you can automatically install the extension and make it available within every company in your Business Central environment. Click on the search icon and type Extension to go to the extension marketplace page.

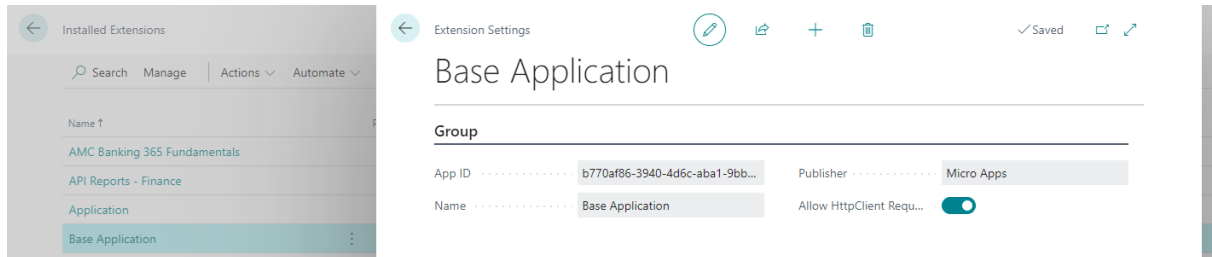

Search for your app and click on Free Trial. Confirm your details and click again on Free Trial. Your App is getting installed and is visible on the extensions page.

Configuration base application

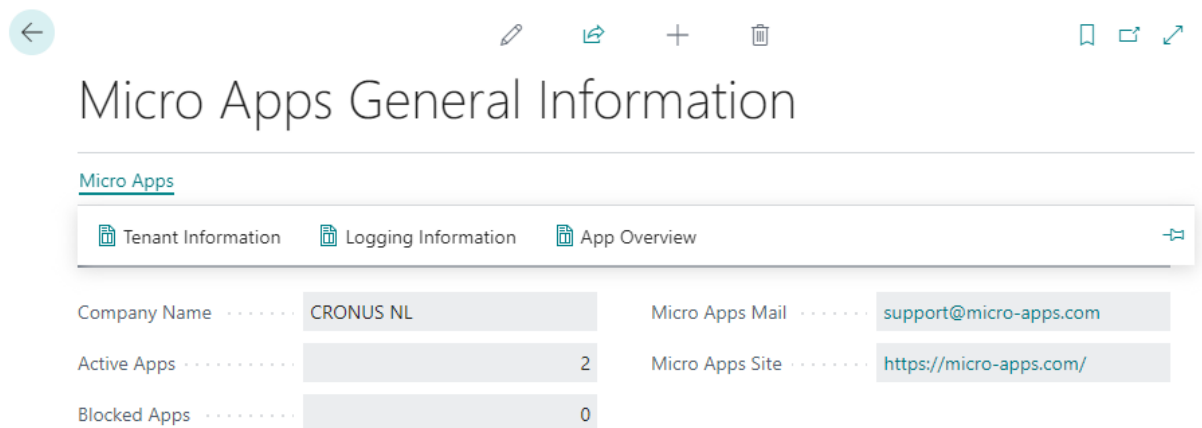

To be able to use the application correctly, you need to make sure that the field “Allowing HttpClient Request” is checked for the Base Application. During the setup you’ll get a message saying to activate this field. If the message did not appear, go to the page “Extension Management” and click on the Base Application by Micro Apps. You’ll see basic information of the app and also the field “Allowing HttpClient Request”. Make sure that the field is checked.

After downloading and installing the application, the setup wizard will automatically show up. During the setup you’ll have to register at Micro Apps.

Registering

Before you can use the application, you’ll need to register. This can be done in the “Tenant Information” page. Navigate to “Micro Apps General Information” and click on “Micro Apps”. You’ll see 3 buttons: Tenant Information, Logging Information and App Overview. To register you’ll need to click on “Tenant Information”.

On the next page you need to fill in your information. After filling in your information, you can click on “Register or Update Tenant Information.” If there’re any changes to the company information, you can fill the fields again and click on the same button. The information will be updated in our systems.

Activating Trial or Subscription

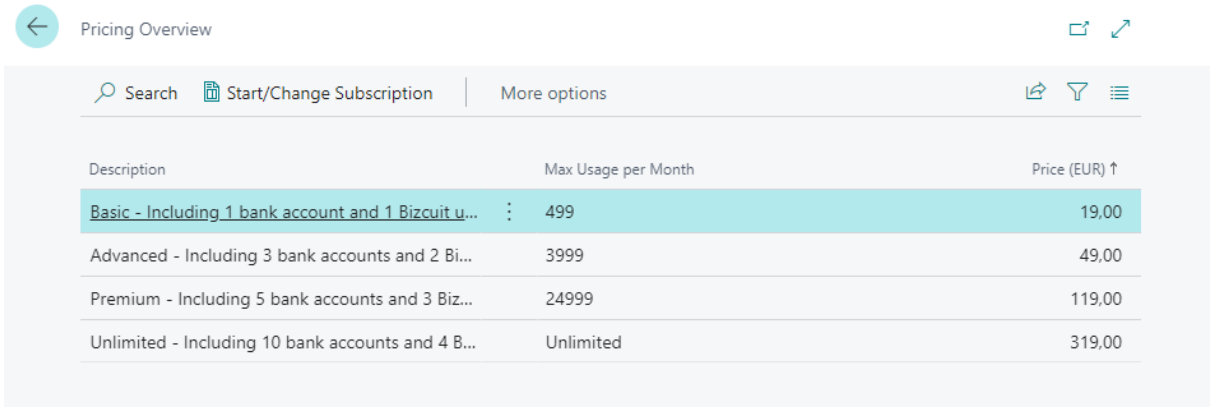

Before you finally can use your app, we need to activate before starting using it. Apps may contain different subscriptions see <https://micro-apps.com/> for pricing and contract details. By uninstalling one of your apps, don't forget to uninstall it within the base application to stop the billing process. (See the next page to uninstall your app). Go back to the "Micro Apps General Information" page and click on "Micro Apps" and select "App Overview". Select your app by clicking on the app name.

The screenshot shows the 'Banking NL' app card in the 'App Overview' section. The card displays the following details:

- Name:** Banking NL
- Max Usage per Month:** 499
- Start Date Trial:** (empty)
- Price Subscription (€):** 19,00
- End Date Trial:** 10-1-2023
- Invoice per:** Month

At the top of the card, there are buttons for 'Start Free Trial' and 'Check Subscription Pricing', along with 'Automate' and 'Fewer options' options.

If you want to test our app, you can start a free trial period by clicking on “Start Free Trial”. If you want to start your subscription, click on “Check Subscription Pricing”. Select the subscription that fits your needs and click on “Start/Change Subscription”.

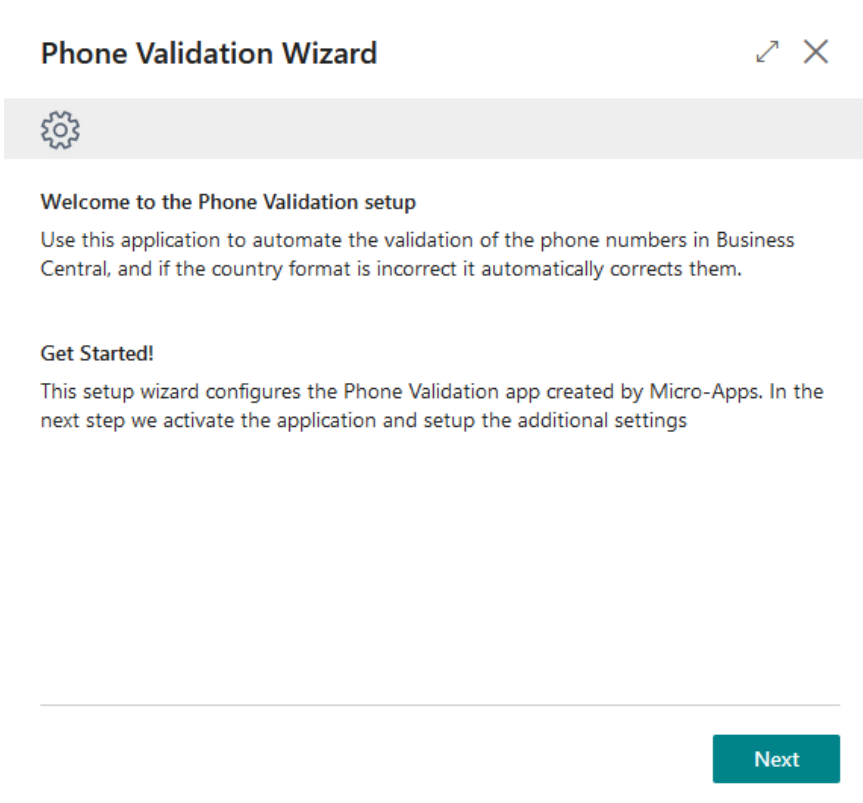

The screenshot shows a pricing overview page with a table of subscription options. The table has three columns: Description, Max Usage per Month, and Price (EUR) ↑. The 'Basic' subscription is highlighted in light blue.

Description	Max Usage per Month	Price (EUR) ↑

Advanced - Including 3 bank accounts and 2 Bi...	3999	49,00
Premium - Including 5 bank accounts and 3 Biz...	24999	119,00
Unlimited - Including 10 bank accounts and 4 B...	Unlimited	319,00

Setup

Once the installation is completed, you'll need to setup the app. This can be done with the Phone Validation Wizard. The wizard contains all the necessary steps to complete the setup for the application. It automatically pops up after installing the application from the AppSource.

The screenshot shows the 'Phone Validation Wizard' setup screen. It features a gear icon in the top left, a title bar with 'Phone Validation Wizard' and window controls, and a main content area with the following text:

Welcome to the Phone Validation setup

Use this application to automate the validation of the phone numbers in Business Central, and if the country format is incorrect it automatically corrects them.

Get Started!

This setup wizard configures the Phone Validation app created by Micro-Apps. In the next step we activate the application and setup the additional settings

At the bottom right, there is a teal 'Next' button.

Pre-setup

If this is your first time installing a Micro Apps application, then you'll need to register. Click on the "Next" button. You will see the following page. On this page you can register yourself at Micro Apps and activate a trial or subscription.

Phone Validation Wizard

Beforehand - Activate trial/subscription

To use this app, you need to register yourself. If you have not registered yet, click on the 'Register' button, fill in the required information on the page and click on 'Register or Update Tenant Information'.

Tenant Information Registered

To use the this app, you need to start a free trial or subscription. If you have not done this yet, click on 'App Card' and activate a trial or subscription.

App Activated

Click on 'Next' if you have a trial or subscription for this app.

Back	Register	App Card	Next
------	----------	----------	------

To register, click on the "Register" button. After registering, you also need to activate the trial or subscription. To activate the trial or subscription, press the "App Card" button. This will take you to the card page of the Phone Validation application. When choosing the trial, keep in mind that you can use the app for 2 weeks free of charge. After the trial period, you'll need to activate the subscription. When you've registered at Micro Apps and activated a trial or subscription, the 2 fields in the image above are checked.

Live phone validation

The application has features for checking live phone numbers on the contact, customer, and vendor cards. We recommend leaving this feature on to get your phone numbers automatically checked. You still have the possibility to leave a phone number incorrect if you want. The other feature checks for mobile phone numbers. If a mobile phone number is detected, the application asks to move it to the mobile number field.

Phone Validation Wizard

Live Validation

This feature validates phone numbers automatically after input

Enable Live Validation

Mobile Phone Validation

Do you want to move phone numbers to the mobile phone field if a mobile phone number is detected?

Check Mobile Input

Back

Next

Validate Existing phone numbers.

You can validate all phone numbers with the bulk validation wizard. To open this wizard, click on the Validate button. You can skip this for now. More information is provided in the user manual.

Phone Validation Wizard ↗ ✕

 **Validate Existing Phone Numbers**

Click on 'Validate' to validate all existing phone numbers.

Permission sets

To make sure that the users have the correct permissions to use the Phone Validation app, the permission set 'Phone Validation' is automatically assigned to every user. You don't have to do anything to set the permissions. After this step, the configuration is finished.

Phone Validation Wizard

Permission Sets

The users of the app do not need additional permissions to use the app. The permission set 'Phone Validation' is automatically assigned.

After this step, the installation and configuration has finished. Click on "Finish" to leave the wizard.

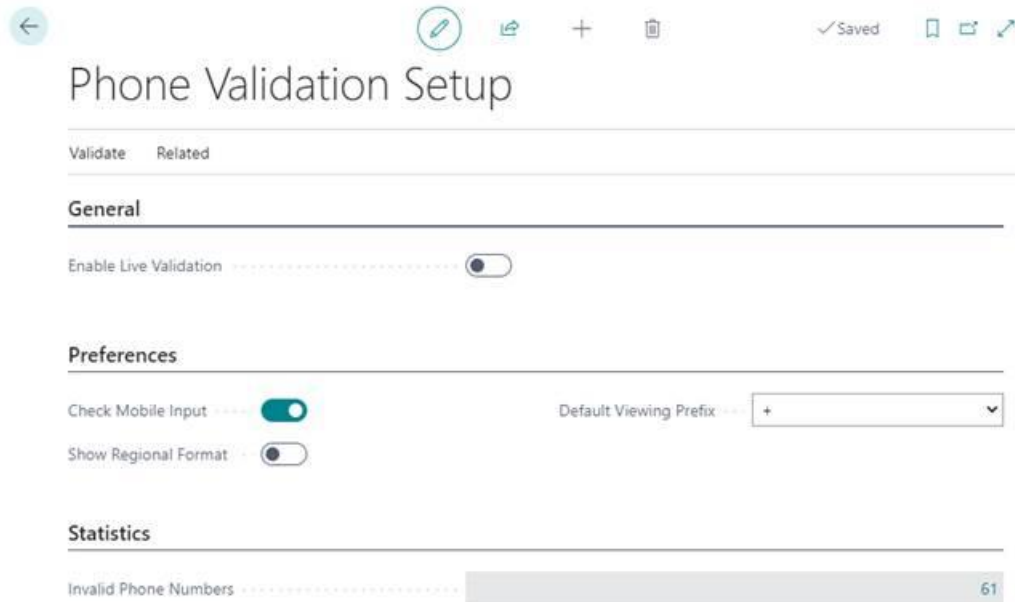

Phone Validation Wizard

The Configuration wizard has finished!

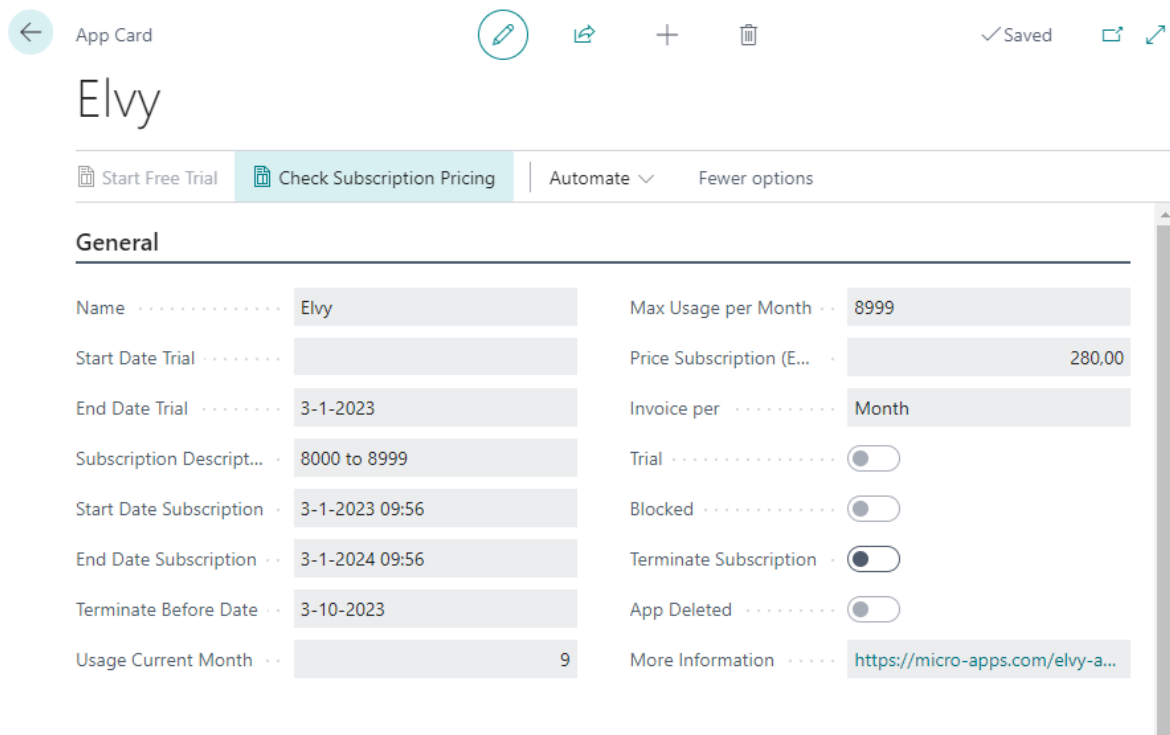

You are now able to use the Phone Validation app. To close this setup, choose Finish.

After the installation and configuration has been completed, the page **Phone Validation Setup** is available in Business Central. With this page, the user can change the default settings, view the incorrect phone numbers, and start the bulk validation process. See the user manual for more information.

Deactivating subscription

To deactivate your subscription, go to “Micro Apps General Information”, click on “Micro Apps” and then on “App Overview”. On this page choose your app.

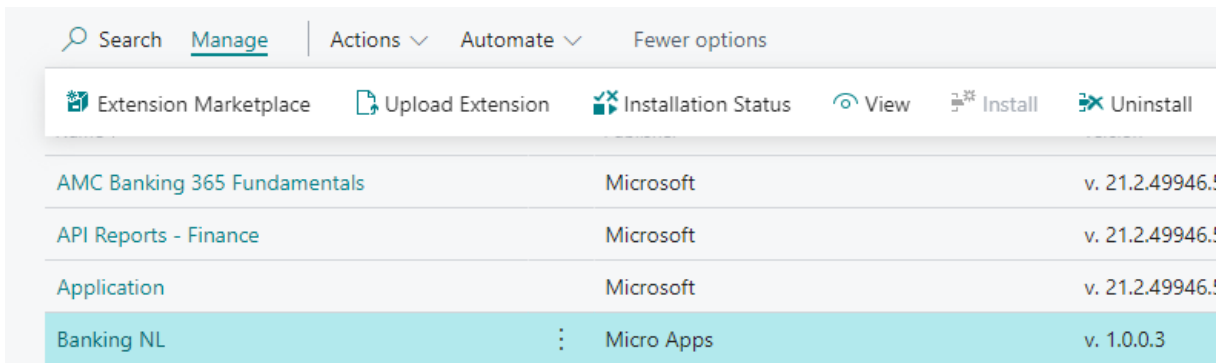

Name	Elvy	Max Usage per Month	8999
Start Date Trial		Price Subscription (E...)	280.00
End Date Trial	3-1-2023	Invoice per	Month
Subscription Descript...	8000 to 8999	Trial	<input type="checkbox"/>
Start Date Subscription	3-1-2023 09:56	Blocked	<input type="checkbox"/>
End Date Subscription	3-1-2024 09:56	Terminate Subscription	<input checked="" type="checkbox"/>
Terminate Before Date	3-10-2023	App Deleted	<input type="checkbox"/>
Usage Current Month	9	More Information	https://micro-apps.com/elvy-a...

On this page you'll see a field called "Terminate Subscription". Check this field to deactivate your Subscription. At the end of your subscription date the app will be blocked. During the period of when you've checked this field and the end of your subscription date, you can change your mind by unchecking the field. **Be aware of the fact that 3 months before your subscription end, you cannot change this field.** If the field is checked, you'll need to make new subscription. If the field is not checked, your current subscription will extended by 1 year.

Uninstalling

To uninstall your app, you can follow the default step of Business Central to uninstall. Go to "Extension Management" and choose the app that you want to uninstall. Next click on "Manage" and then "Uninstall".

Search	Manage	Actions	Automate	Fewer options	
AMC Banking 365 Fundamentals	Microsoft	v. 21.2.49946.!			
API Reports - Finance	Microsoft	v. 21.2.49946.!			
Application	Microsoft	v. 21.2.49946.!			
Banking NL	Micro Apps	v. 1.0.0.3			

A new screen will open and Business Central will ask you if you want to delete the extension data. To completely uninstall the app, check this field. After uninstalling the app, you can choose to unpublish the app or not. You can do this by clicking on "Unpublish" under the "Manage" tab.
